

CARLA load trailer:

**The innovation for arborists -
versatile, cost-saving, environmentally
conscious!**

Arborists face a variety of challenges, from difficult terrain to the safety of people and the environment. Choosing the right means of transportation is crucial for efficient work. This is where CARLA comes into play - the innovative solution for arborists.

1. Effortlessly through difficult terrain

Whether narrow alleys, uneven terrain or hard-to-reach locations. CARLA gets you where you need to go without compromise.

2. Flexibility as a handcart

In no time at all, CARLA can accompany you directly to your next destination as a practical handcart.

3. Efficiency and comfort on every kilometer

With a load capacity of up to 200 kg and the electric eCARLA, you can transport heavy loads with ease, save time and money and move agilely through city traffic and country lanes.

CARLA CARGO

Your optimum setup:

The **eCARLA offroad** with cargo wheel offers arborists a practical transportation option. Equipped with a safe and powerful battery, it enables **effortless transportation** to various locations. The special railing is ideal for lashing down equipment. Thanks to the **"Light base plate"** with airline rails, CARLA offers maximum flexibility for transporting clippings, tools or machines.

"A working day
without my CARLA?
I can no longer
imagine it!"

Cyril, HappyTreeFriends in
Bern
